CIMMETRY INTRODUCES AUTOVUE 3D PRO – SME, PROVIDING COST-EFFECTIVE NATIVE VISUALIZATION FOR SOLIDWORKS, INVENTOR, AUTOCAD MECHANICAL AND SOLID EDGE

Cimmetry Delivers AutoVue 3D Pro - SME for Small and Medium-Sized Enterprises

Montreal, Canada, March 12, 2007 – Cimmetry Systems, an Agile Software company and global leader in collaborative visualization solutions, today announced the immediate availability of AutoVue 3D Pro – SME, the latest addition to Cimmetry's AutoVue family of visualization solutions, targeting the small and medium sized enterprise (SME) market.

Strong demand for Cimmetry's native viewing technology has created the need to recognize the special requirements of small and medium sized enterprises and their tendency to work with the lower priced, mid-range 3D CAD packages. Cimmetry's new AutoVue 3D Pro – SME provides users of mid-range 3D CAD packages, such as SolidWorks, Autodesk Inventor, AutoCAD Mechanical and Solid Edge, with the freedom to choose their authoring tools and still work with different mid-range 3D formats from partners, customers or suppliers.

Customers that require the ability to view the higher-end 3D CAD packages, such as CATIA, NX or Pro/Engineer, may upgrade to the AutoVue SolidModel Pro product.

AutoVue 3D Pro – SME features powerful native document viewing, markup, printing, stamping and collaboration capabilities for the leading mid-range 3D CAD packages, as well as leading 2D CAD tools, providing users with the ability to quickly view documents without requiring authoring applications or undergoing costly and error prone file conversions with publishing systems.

AutoVue 3D Pro – SME version 19.1 is available in both a Desktop and Web Edition and can be purchased from Cimmetry or through a global network of Value Added Resellers. For sales inquiries or to locate a local VAR visit our web site or call +1-514-735-3219. http://www.cimmetry.com/partners_vars-lookup.html
